

Pushed by the Texas Attorney General, Dallas school officials have made public "organizational health" scores that measure teacher morale and working conditions at more than 200 schools, revealing the best and the worst about work life in a Dallas public school.

The scores range from 1 to 99 and are based on 10 factors considered key to a healthy work environment and higher student test scores, including morale, problem-solving ability, creativity and good communication. Teachers and other certified staff rate each factor as they respond to 80 statements in a survey. The data is converted to percentile scores based on national norms.

Here is a description of each factor shown in the data below, with the final column representing the overall score for 229 Dallas public schools in 2008-09:

GOAL FOCUS (GF): Understanding, accepting and supporting goals.

COMMUNICATION ADEQUACY (COM): Having clear and open two-way communication.

OPTIMAL POWER EQUALIZATION (OPE): Being able to balance power.

RESOURCE UTILIZATION (RES): Being able to coordinate team members' talents with minimal stress.

COHESIVENESS (COH): Having a clear sense of organizational identity, cultivating an environment where members feel attracted to it and want to stay.

MORALE (MOR): Having a feeling of well-being, satisfaction and pleasure.

INNOVATIVENESS (INN): Being and allowing others to be inventive, diverse and creative and to take risks.

AUTONOMY (AUT): Having the freedom to manage things.

ADAPTATION (ADA): Being able to tolerate stress and maintain stability.

PROBLEM-SOLVING ADEQUACY (PSA): Perceiving problems and solving them with minimal energy.
